## **DETAILED ACTION**

I. Rejection of claim 1 under 35 USC 103(a) as being obvious over Yang will not be maintained.

- II. Applicant's arguments filed 12/20/04 have been fully considered but they are not persuasive. See argument below.
- A. Rejection of claims 1-6 under 35 USC 103(a) as being obvious over Zhang or Chen will be maintained for reason on record and reason as follows.

Applicant argues that Examiner did not address all of the arguments. Examiner disagrees with Applicant. Examiner addressed major focus of which all Applicant's arguments are based, i.e., Examiner addressed the unpatentability of weight based dosing of arsenic trioxide which is the major focus of all of Applicant's arguments. Applicant's amendment to the claim 1 comprises determining the weight of a patient diagnosed with cancer and determining a therapeutically effective dosage amount of arsenic trioxide based on the weight of said patient. Amendment to claim 1 from which all other claims depend center around weight based dosing of ATO to cancer patients. Examiner does not believe that such an amendment to claim 1 makes claim 1 patentable for reason on record and reason as follows. Weight based dosing is not new and such dosing has been practiced with a number of drugs. In fact, Examiner maintains that Zhang and Chen suggest that ATO can be administered based on the weight of the cancer patient since both Zhang and Chen utilize the language "therapeutically effective amount" which suggests that different cancer patients can receive different amounts of ATO.

B. Double Patenting Rejection on record will be maintained for reason on record and reason as follows. Applicant argues that USPN '304 on record does not suggest the administration of ATO to a cancer patient based on the weight of the patient. Examiner maintains that USPN '304 suggests that ATO can be administered based on the weight of the cancer patient since the patent utilizes the language "therapeutically effective amount" which suggests that different cancer patients can receive different amounts of ATO.

C. Applicant discusses Soignet, Hussein, Au, Westervelt and Ellison's declaration to support weight base dosing of ATO. Examiner argues that weight base dosing of ATO was already suggested in the prior art. See A and B above.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
